Administrative Information

Acquisition Information

Ernst Herzfeld donated his papers to the Freer Gallery of Art in 1946.

Provenance Information

It was his friend and colleague, Richard Ettinghausen, then curator of Near Eastern art at the Freer Gallery of Art, who encouraged Ernst Herzfeld to donate his papers to the Smithsonian Institution. Since the original gift in 1946, there have been a number of significant additions. Herzfeld's sister, Charlotte Bradford, arranged for several donations to be made from the estate in 1950 and 1951, and, at her request, papers left by Herzfeld in Cairo were given to the Freer Gallery by Prof. Murad Kamil of Fuad I University in 1952. After extensive investigation, Herzfeld's final edited manuscript of "The Persian Empire", thought to have been lost, was discovered and given to the Freer Gallery in 1965 by the French Institute of Oriental Archaeology in Cairo. An old friend, the numismatist George C. Miles, added substantially to the papers in 1960 and 1970.

Biographical Note

The Ernst Herzfeld Papers document the career of Ernst Herzfeld (1879--948), a German architect, archaeologist, and historian of Islamic and Pre-Islamic studies. After training as an architect he studied archaeology under Delitzch from 1903 to 1906 at the excavations at Assur in Mesopotamia. A student of Latin, Greek, Arabic, Persian, Turkish, and Hebrew, Herzfeld received a doctorate in Humanistic Studies at universities in Munich and Berlin in 1907. His work with Friedrich Sarre to survey the monuments of the Tigris-Euphrates valleys resulted in landmark studies in architectural history, published in 1911 and 1920.

In 1920 Herzfeld was appointed to the chair of Historical Geography in Berlin and began his excavation at Samarra. Herzfeld's work there led to a six-volume publication. He published widely throughout his life on the sources of Islamic architecture and ornament, including the Royal Palace at Persepolis.

From 1934 until the end of his life Herzfeld spent his time producing many books and articles, lecturing, and working at the Institute for Advanced Study at Princeton (1936--945.) Many of his works continue to be published post-humously.

Series 1: Travel Journals, 1905–1928

The travel journals are in Herzfeld's handwriting in German. They have been transliterated into typed versions of which each page is faced by a xerox copy of the original, showing sketches and inscriptions.

General note
It is impractical to include in the Index the name of every person or place mentioned in the Journals. These were essentially short-hand notes intended to remind Herzfeld of facts to be incorporated in subsequent finished studies. Many of the items, especially in N-81 and N-82, are topographical notes for the preparation of maps. Herzfeld tended to note everything he saw and heard, so the Journals contain descriptions of plant and animal life, as well as comments on the countless people he encountered, their economic and their social activities. The Journals also contain descriptions of the practical daily problems of travel, especially with a caravan; the dreams or nightmares he experienced on sleepless nights; and a great variety of thoughts on politics, people or history which crossed his mind during the sometimes tedious hours of travel. He even includes snatches of poetry.

The items entered in the Index are, therefore, primarily those of archaeological significance in the narrow sense of ruins, buildings and artifacts, especially if Herzfeld inserted a sketch. He was accustomed on these exploratory trips to supplement the Journals with comprehensive photographic record (see the inventory to the photographic File) and sketchbooks (see the inventory to the sketchbooks).

The circumstances under which the Journals were written often led to inconsistencies in the spelling which was sometimes again modified in printed texts. It might also be mentioned that there are differences in the transliteration of Near Eastern script according to the French, German or English systems, not to speak of the "personal" systems sometimes adopted by writers in the field. Since Herzfeld published in all three languages, all three systems occur in the catalogues of the collection; but I am confident that that fact will cause no particular hardship for scholars.

Volume N-127  N-127: "Sent from Cairo"

Volume N-127  N-127: 1. Folder marked "Pahlavi" contains studies of Pahlavi inscriptions, such as monograms on bullae, and what appears to be a preliminary draft of an article attempting to elucidate the relationships between monumental and cursive scripts and Pahlavik, Parsik and book Pahlavi. It starts: "Die Awesta-schrift ist, trotzdem sie die einzelnen Buchstaben nicht verbindet, eine Schreibschrift, eine Kursive, keine Denkmalschrift, keine monumental."

Volume N-127  N-127: 2. Envelope containing pages apparently from a draft of The Persian Empire, Chaps. XIV-XV dealing with the Achaemenian Satrapies as reflected in the figures of Tribute-bearers and Throne-bearers at Bistun, Persepolis and Naqsh-i Rustam

Volume N-127  N-127: 7. Folder containing a copy of the Pahlavi inscription on the Ka'ba at Naqsh-i Rustam (either for Ghirshman or by him)

Volume N-128  N-128: 1. A brown envelope marked "Pahlavi Material List". The bulk of the material on the inscriptions at Paikuli is in N-128, supplemented by an Album of photographs and blueprints in N-129 and a black, loose-leaf notebook (Corpus), No.8 in N-127. The material was examined and catalogued in 1953 by Prof. J. de Menasce, University of Fribourg, Switzerland. His detailed catalogue and comments are given in two papers in the file, one entitled "A Provisional Inventory of the Literary Remains of the late Professor E.E.Herzfeld concerning Iran..."; the other "A Guide to the Middle Persian material in the Herzfeld Archive.....". The Guide also has additions or emendations in pencil, presumably entered at a later date, probably by Prof. R.N.Frye. An element of confusion is introduced in the Paikuli material by the 32 blocks either newly discovered or cleaned, re-photographed and re-drawn by Herzfeld in 1924, after the publication of the earlier blocks had
appeared in the Paikuli volume. The new blocks required some re-arrangement in the ordering of the original blocks. As Prof. de Menasce implies in his note, only a close study of the material by a competent scholar can determine which of the proposed arrangements is the correct one.

In addition to the above guides, there is (1) a separate undated and unsigned sheet entitled "Pahlavi Material in the Herzfeld Collection" and (2) a new summary of Herzfeld's last arrangement of Paikuli blocks, including those unpublished, based on the arrangement in No.13, N-128. The summary gives the old (Herzfeld's) numbers of the original squeezes in the Archive (noted on separate file catalogue cards) and the new numbers given to the squeezes when they were re-organized for storage. The summary also gives the negative numbers of the squeezes and stones (when available) and the numbers of the published blocks as they appear in Herzfeld's last copy.

With the papers noted above is a detailed catalogue of three of the four large Albums in N-129, prepared by Pére de Menasce, as well as correspondence of Mr. Wenley, Prof. de Menasce and others concerning the publication of the Paikuli material. For information about the squeezes themselves, see the "Catalogue of Squeezes".

Series 4: Photographic Files, 1903-1947

The prints are from three sources: (1) those from glass negatives; (2) those from cut film; and (3) those for which there are no negatives.

The Archive contains Herzfeld's glass negatives, numbered from 1 to 3850. Of most of these he had blueprints made which he had arranged in 16 binders by general categories--e.g. Prehistoric pottery, bronzes, stone; Persepolis; Sasanian monuments; Syrian monuments, Persian architecture and landscapes, etc.--respective of the number on the negative. These formed the nucleus for the preparation of the Photo Files. The 16 binders of blueprints have been replaced by Photo Files, Nos. 1--6. The prints in each File are arranged in the same order as the blueprints; and the number of the negative is enclosed in parentheses. Following a brief identification, is a reference to the place where the print has been published, if that is the case and such publication has been located.

In addition to the blueprint binders there were three Albums - Photo Files 25 (Sasanian buildings), 27 (Parthian and Sasanian sculptures) and 28 (Pre-Achaemenian monuments and Pasargadae)--in which Herzfeld had arranged prints in a sequence for study or publication purposes. The order in those Photo Files retains that in the Albums.

In addition to the glass negatives, there is an even larger number of cut films. On his archaeological study trips, Herzfeld was accustomed to supplement his photographs on glass plates with photographs on cut film--sometimes of the same subjects, often of other subjects. Some prints to these negative were identified on the back or could be identified from other prints; but in many instances, especially of landscapes, it has not been possible to place them, except in general categories.

Prints from the cut films have been organized, so far as feasible, in groups of related material and placed in the Photo Files of similar subject matter. The negative number appears in the Photo File. Herzfeld also collected prints from many sources for study purposes. Of those there are no negatives. So far as possible, the prints have been identified and placed in the appropriate Photo File.

The Samarra material, Photo Files 19--3, is in a special category. Files 22 and 23 were arranged in Albums labeled "Paläste und Moscheen-I and -II", respectively. The only identification was written on the backs of the prints, glued to the pages of the Albums. These notations have been transferred to the captions in the Photo Files. These two Albums apparently were arranged by Herzfeld with a view to a publication of the architecture of Samarra which was never prepared. The drawings for such a publication are in this collection.

With such a large number of prints, especially in view of the fact that some were arranged in different fashions for different purposes, it is inevitable that there should be some duplication and that related material may be found in several Photo Files. The only way a user can be sure he has not missed material concerning his particular interest is to examine the Photo File Lists where every print is recorded. Inasmuch as scholars study the same monument from different points of view, the fact that a photograph has been published in one context does not diminish its value in another context.

Note: Photo Files 35--2 consist of Oriental Institute prints of which the negatives are in Chicago. The prints may be published only with the written permission of the Oriental Institute.

4.14.2
The prints from number 45-1 through 77 are from unmarked films. Most were probably taken by Herzfeld 1908--914 or 1914--0, during the periods when he and Sobernheim, or he alone, were recording inscriptions on and near Aleppo. Herzfeld traveled also in Palestine and other places in Syria. Unless the prints are labelled, the locations are uncertain, though probably in Palestine or Syria.

4.21: Photo File 21: Samarra: Malereien
Inventory unavailable
Prints of illustrations in vol.III, Die Ausgrabungen von Samarra, insofar as available in this collection. Plate numbers are from the printed text. In some cases, the black and white print also has a colored duplicate. At the end of the file (III, 1–3) are prints of apparently unpublished pieces, unless noted. The inventory numbers on the backs of the prints refer to the Expedition Inventory of Finds in this collection (No.S-1); and the negative numbers to the Samarra series. No negatives are in this collection. See Note for File 22.

The records regarding the excavations at Samarra are listed under the series S-1 through S-41. The drawings are given in the Index of Drawings: D-1016--140 and D-1234--237. With a few exceptions, noted in the Photo Files, the negatives are not in the collection.

Herzfeld apparently envisaged one or two volumes of the Samarra series to deal with the architecture of the palaces, mosques and private houses. Files 22 and 23 were Albums of photos arranged, perhaps, in a tentative order. The only identification was written on the backs of the prints which were glued to the Album page. In removing for re-mounting, the writing was sometimes damaged by the glue. All that was legible is noted.

The first number is in red crayon and is the number used in the captions as the negative number. In some cases, an additional number is given in blue crayon, possibly indicating a revision of the list or an alternative negative. The encircled number on the margin gives the position in the Album. There is in the collection a package of duplicate prints of many of these which are, for the most part, unpublished. They should be studied in conjunction with the Sketchbooks, Notebooks, drawings and; File 19, Die Wandschmuck.
